SUMMARY

Creative, disciplined, and technically versatile professional with over 10 years of experience in high-performance kitchens, and more than 15 years in music production and audio engineering. Recognized for operational excellence in luxury dining environments, and known for precision, adaptability, and leadership. Recently certified in full-stack development through the University of Central Florida Coding Bootcamp, where I collaborated on multiple team projects, and independently developed user-centered applications. Passionate about building systems from scratch, leading creative teams, and blending art and science to solve real-world problems across culinary, audio, and digital platforms. Notable projects include AudioSpot, Skill Starter, and Flare48each reflecting my commitment to innovation, functionality, and creating meaningful user experiences through clean design and purposeful development.

SKILLS

- Pro Tools
- Javascript (ES6+)
- Prompt engineering
- Node.js & Express
- Postman & Insomnia
- UI/UX Wireframing
- JWT Authentication
- Git & GitHub

EXPERIENCE

CHEF DE PARTIE, The Ritz-Carlton Company, March 2025-Current
Naples, FL

- Led fast-paced kitchen teams with a focus on precision, timing, and high output, similar to agile development cycles. Designed and optimized workflows to reduce friction and increase performance, akin to streamlining code and CI/CD pipelines. Developed and executed new dishes through rapid prototyping, testing, and iteration, comparable to UI/UX or feature development. Mentored junior cooks, fostering a collaborative and growth-focused environment.

AUDIO ENGINEER, Freelance, September 2006-Current
Naples', FL

- Engineered high-quality audio using Applications like Pro Tools and Reason, similar to designing intuitive audio-based applications or interfaces. Managed multiple audio projects using collaborative tools and platforms, maintaining deadlines and versioning, paralleling Git workflows and Agile methodology. Built original tracks and audio systems from the ground up aligns with full-stack development and creative software design.

EDUCATION AND TRAINING

Certificate

Computer Engineering, University of Central Florida , Online March 2025

High School Diploma

Naples High School, Naples, FL May 2005

ACTIVITIES & PROJECTS

- During my time at the UCF Coding Bootcamp, I collaborated on three major team projects and independently developed several additional applications that I'm proud to showcase. My portfolio reflects a balance of collaborative teamwork and self-driven development, highlighting my ability to build responsive, full-stack applications from the ground up. Notable projects include:
- **AudioSpot** A dynamic music blog platform that enables users to explore, share, and engage with music-related content. This project focused heavily on delivering an intuitive user interface and immersive user experience.
- **Skill Starter** A skills-first application designed to help users showcase their abilities and connect with growth opportunities. This project introduced me to real-world deployment, teaching me how to keep an application live and stable through workflow challenges.
- **Flare48** A full-stack news aggregator that pulls stories from the past 48 hours, offering a sleek and timely news browsing experience. This project demonstrates my end-to-end development skills from building RESTful APIs to refining front-end design and functionality.
